Baltic Summit 2025

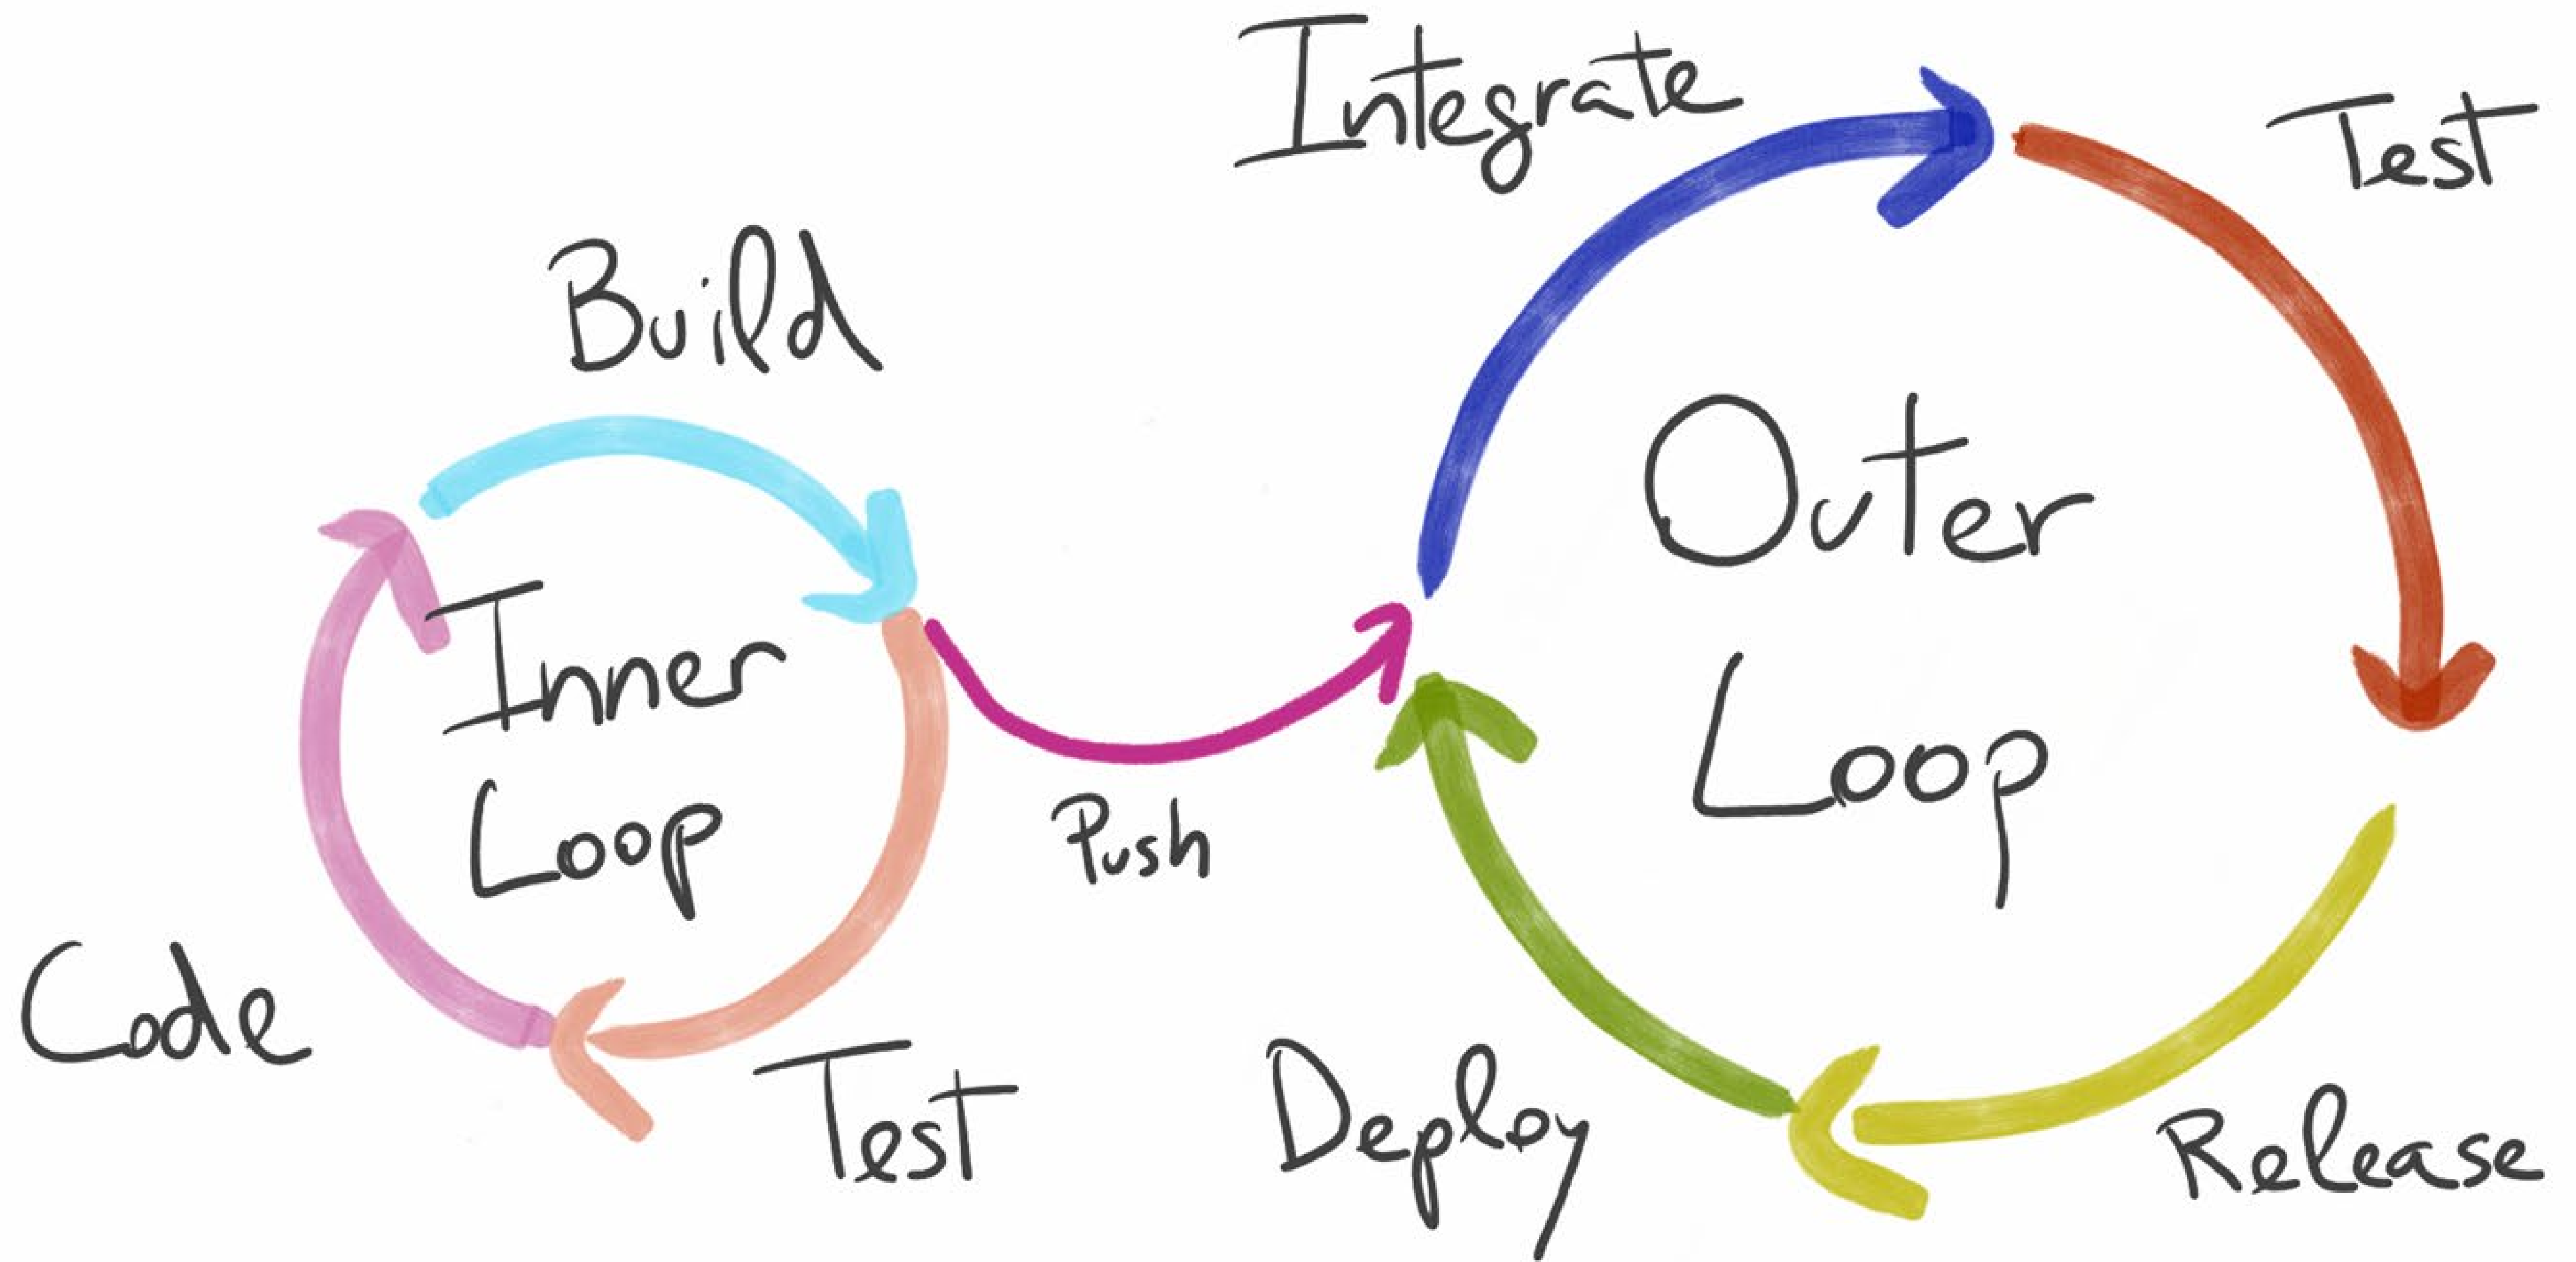

APPLICATION LIFECYCLE MANAGEMENT

ALM

#BalticSummit2025

THE EVOLUTION IN POWER PLATFORM

1.0

Manual ALM

Citizen devs & small projects

Simple and useful, but lacks, visibility, security, governance, and quality control

Inefficient and error prone

2.0

Tools & accelerators

Split by persona for citizens or professionals. Not both.

Enterprise grade CI/CD with extremely **high complexity**

Drives velocity only for **certain projects** while alienating others

High setup costs per project

3.0

Native

Democratized for **all personas**

Enterprise grade CI/CD with **low complexity**

Drives velocity for **all projects**

Lower TCO at **scale**

DO-IT-YOURSELF

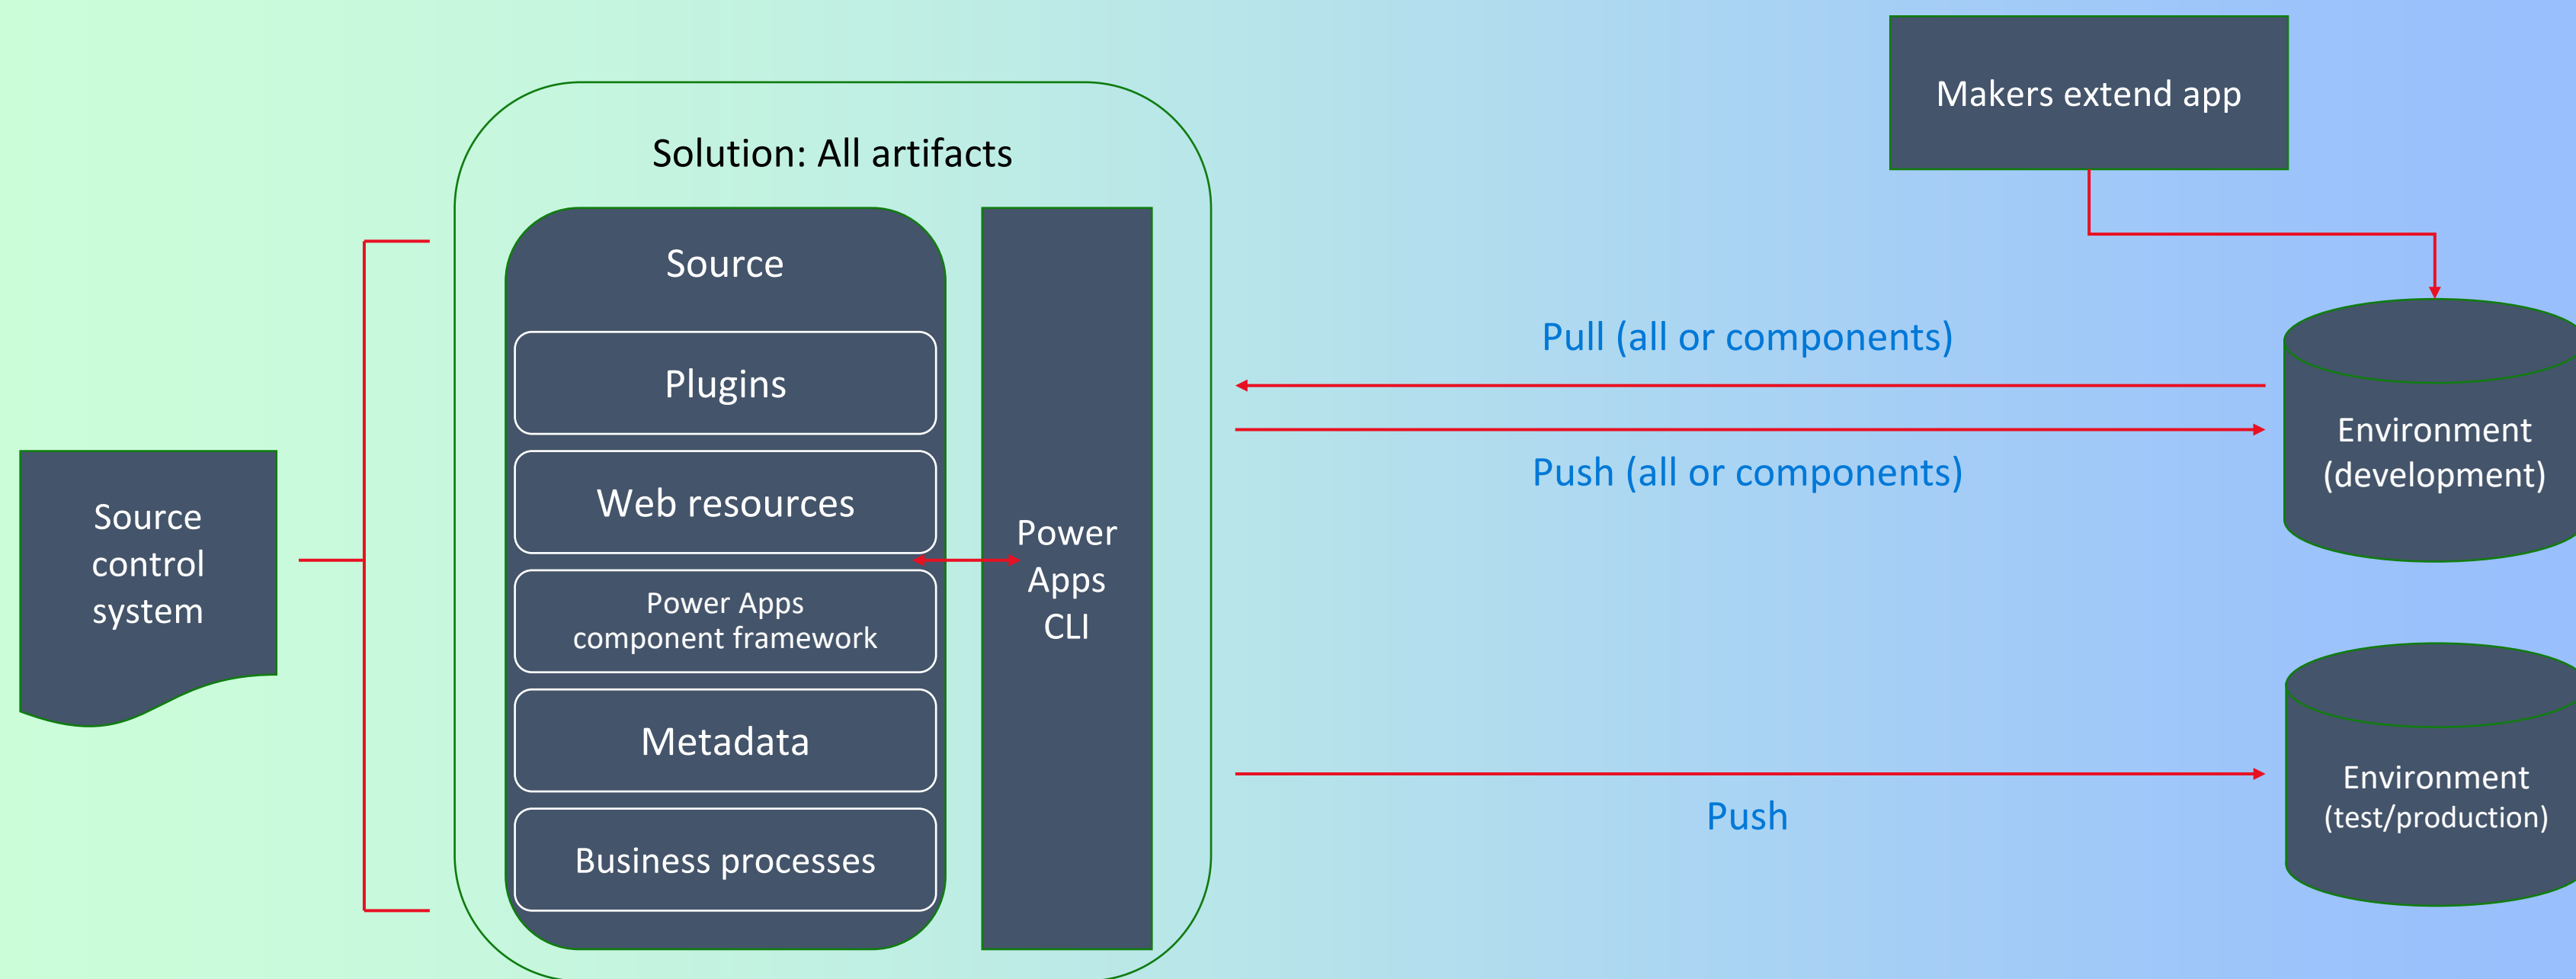

PRO-DEV

DO-IT-YOURSELF

SOURCE CONTROL

MAKERS

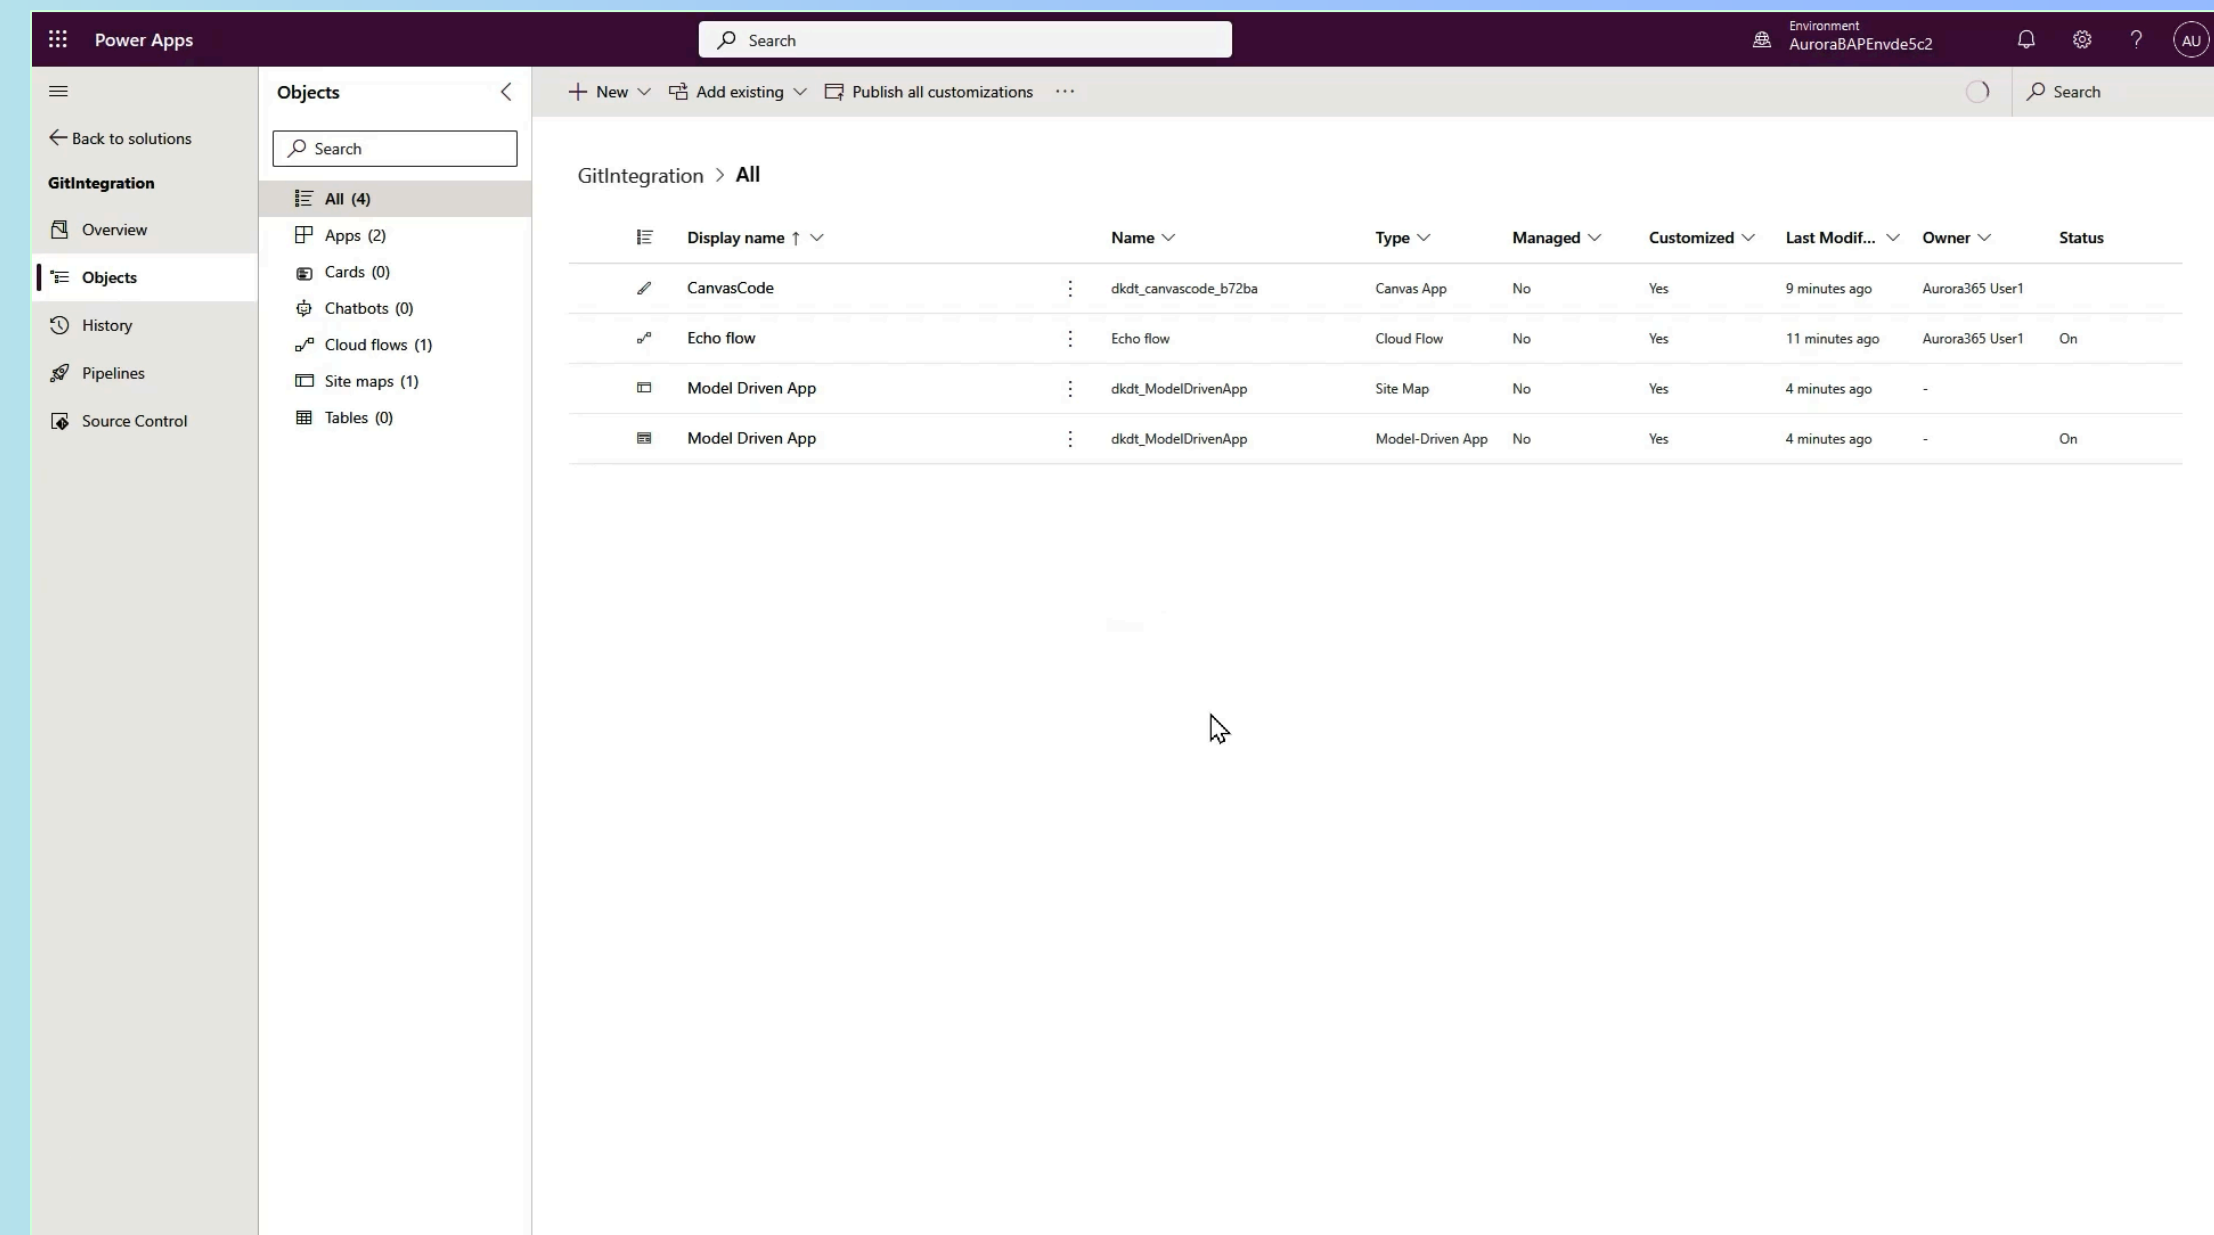

#BalticSummit2025

NATIVE SOURCE CODE INTEGRATION

- Connect in seconds (No tools to set up)
- Fusion development across N environments and source control
- Simple, powerful Git version control for all of Power Platform
- Works safely with branches, code reviews, and backups in Azure DevOps repositories

GIT INTEGRATION

DEMO

PIPELINES IN POWER PLATFORM

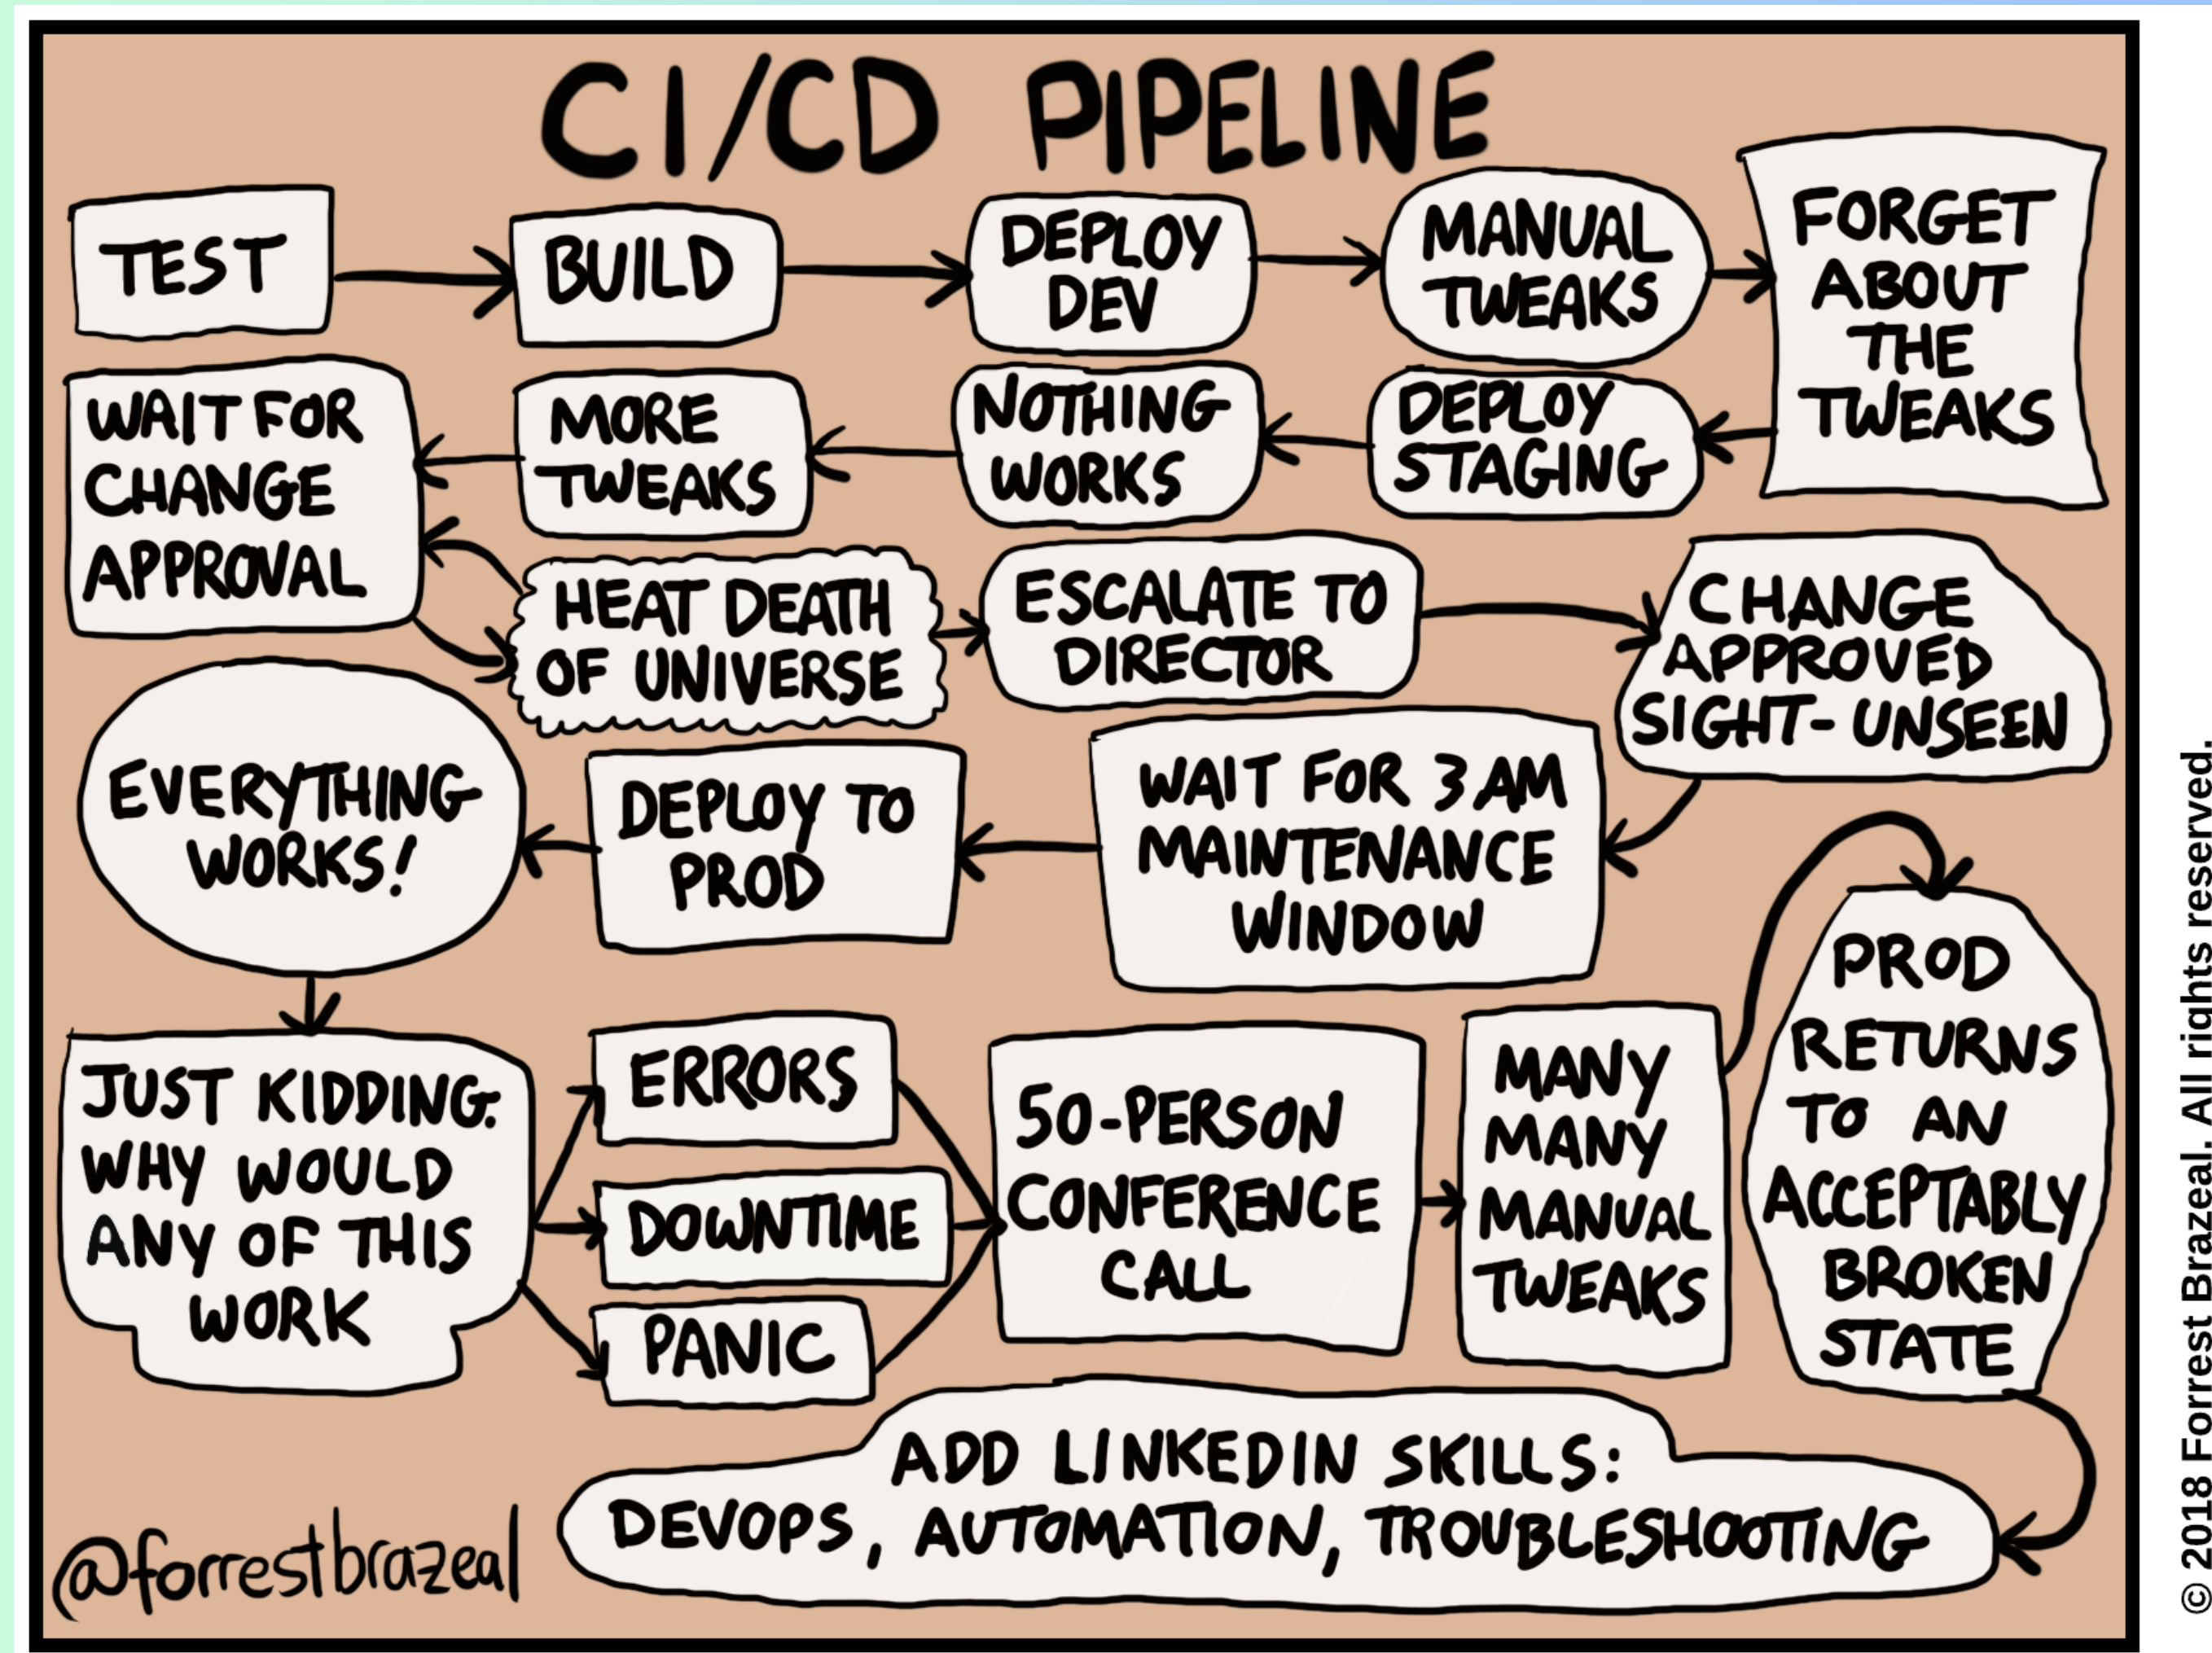

MAKERS

#BalticSummit2025

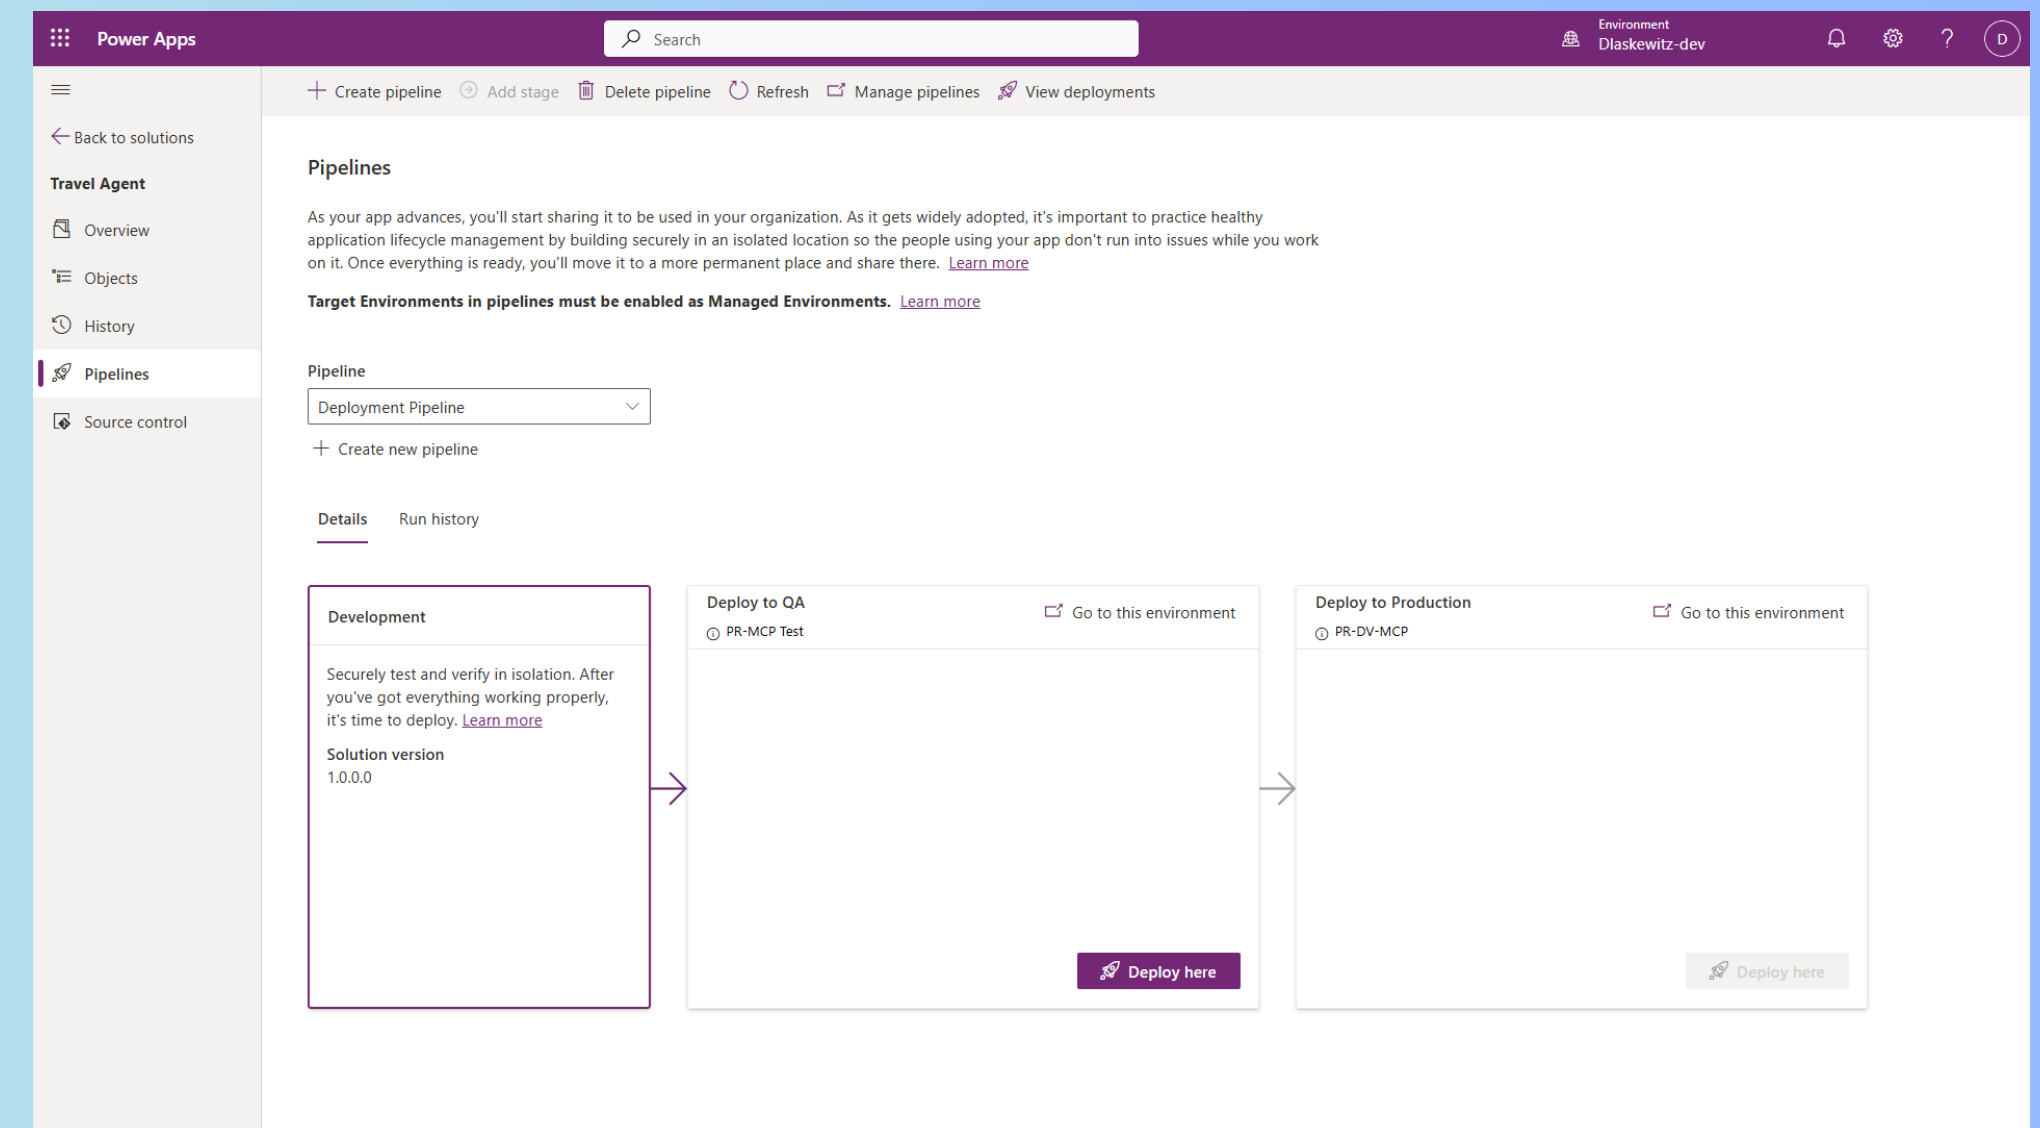

PIPELINES IN POWER PLATFORM

- Democratizes ALM with user-friendly CI/CD capabilities
- Enables admins to configure deployments in minutes, not weeks
- Allows makers to deploy solutions with just a few clicks
- Supports developer extension via CLI and integration with other tools

BalticSummit2025

SETUP

DEMO

Baltic Summit 2025

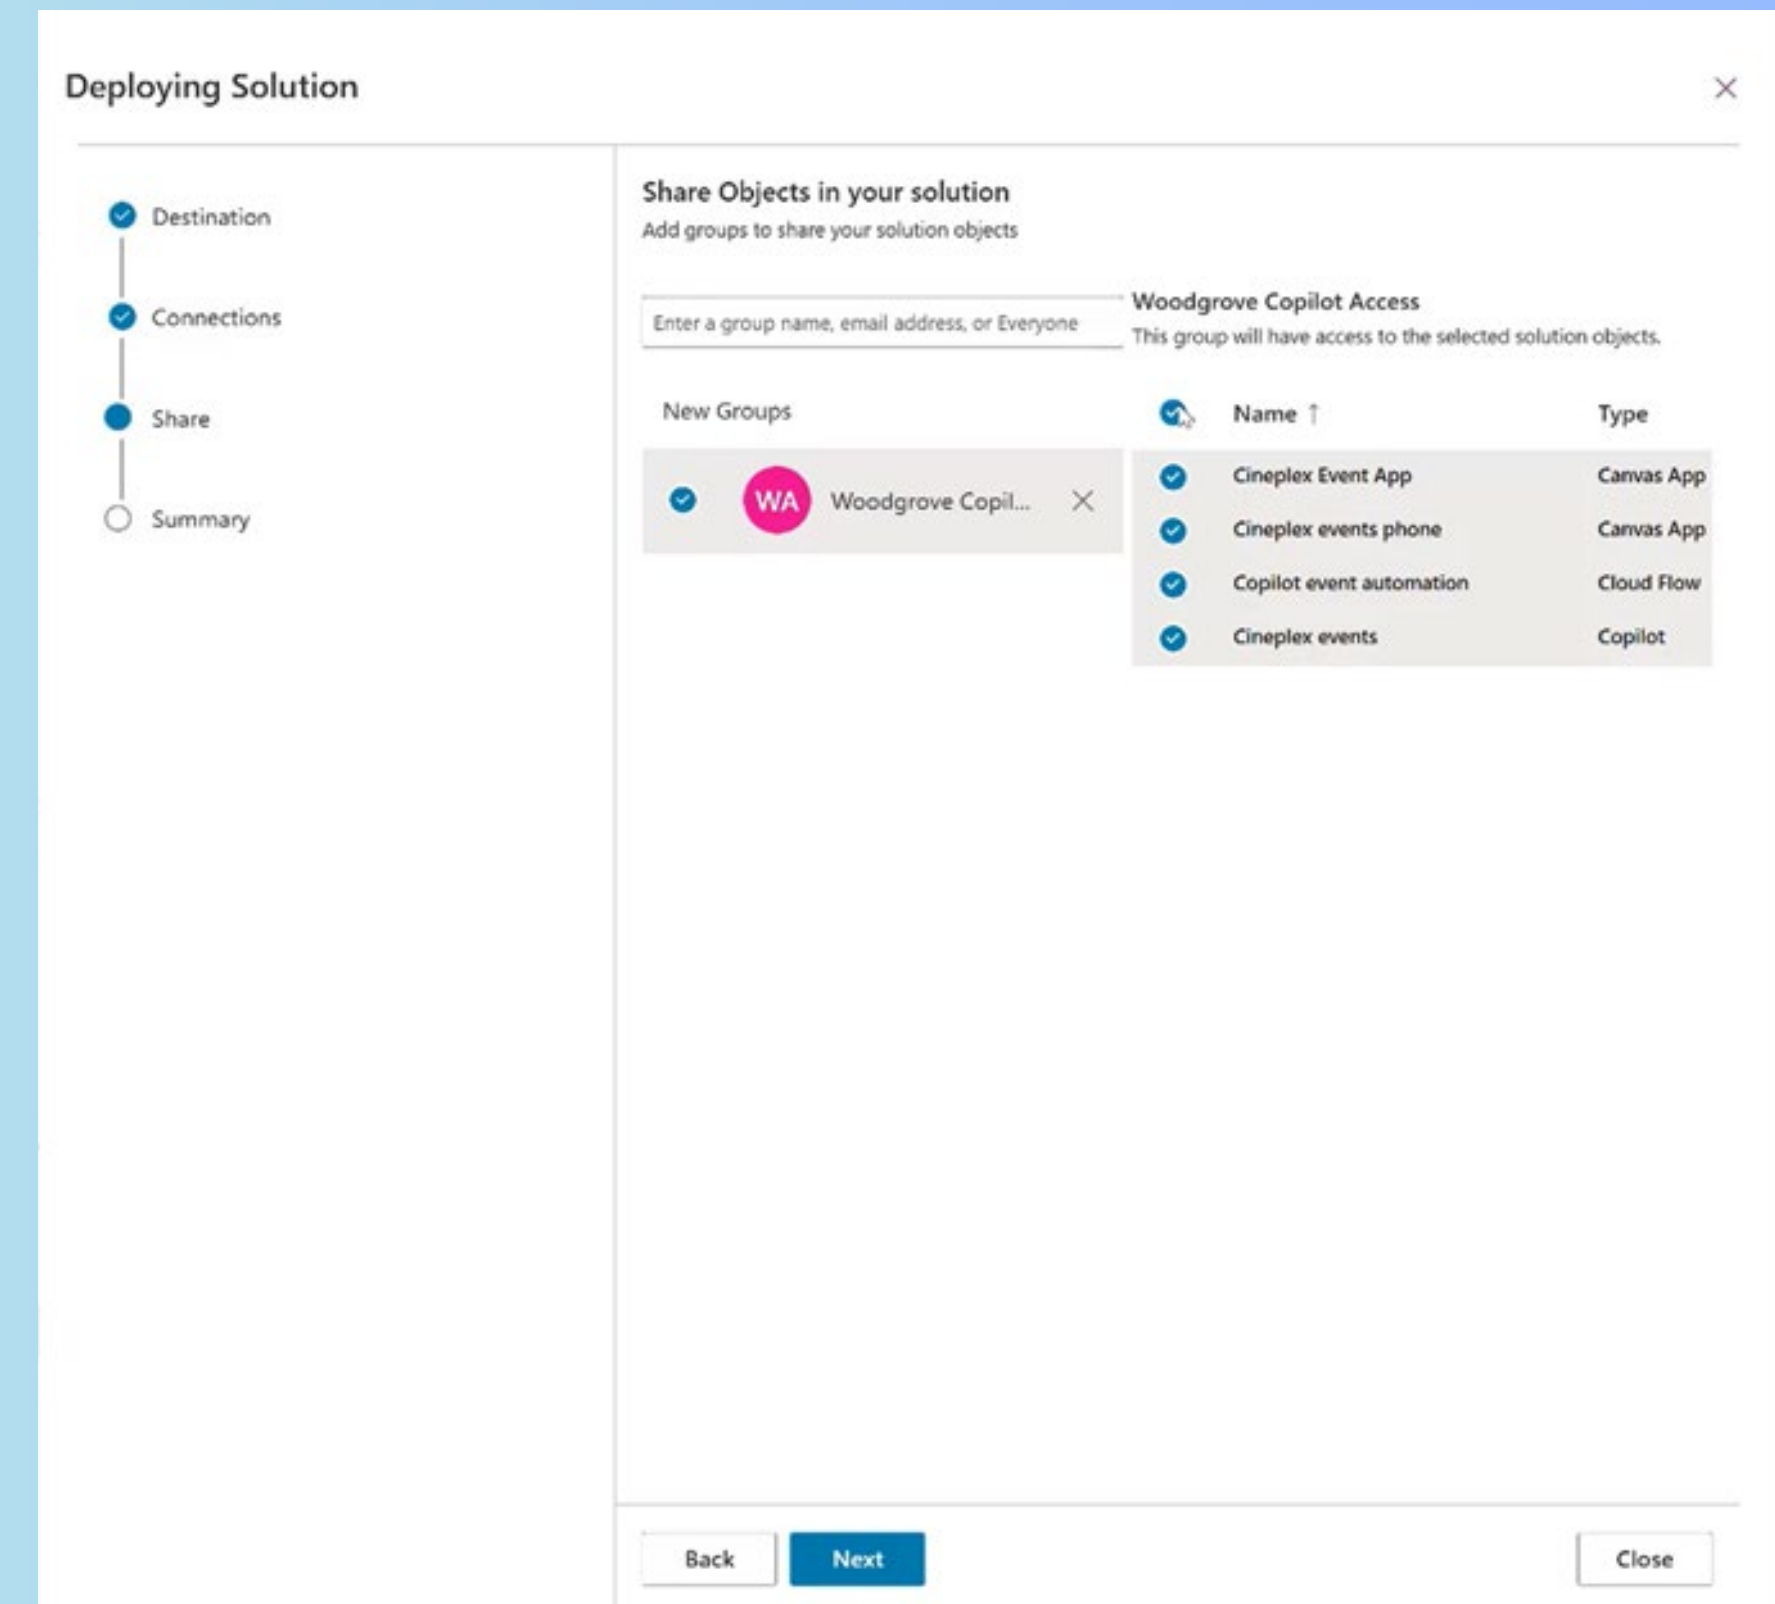

DELEGATED DEPLOYMENTS (SPN)

- Makers deploy to production without needing elevated permissions
- Admins keep productions data and applications protected with least privileged access

The screenshot displays the 'Power Apps' interface for 'Deployment Pipeline Configuration'. The left sidebar shows navigation options: Home, Recent, Pinned, Overview, Pipeline Setup (with sub-items: Pipelines Dashboard, Pipeline Setup, Environments, Pipelines), Deployments (with sub-items: Run history, Solution artifacts), and Pipelines. The main content area is titled 'Contoso delegated pipeline - Saved' and shows the 'General' tab. It includes a table for 'Linked Development Environments' with one entry: '[Pipelines Master] Dev Env' (Development Environment, ID: 73106688-5209-ee04-8ea7-61b5b93ad2f9, Status: Success). Below this is a table for 'Deployment Stages (Deployment Pipeline)' with one entry: 'Contoso Production' (Deployment Pipeline: Contoso delegated pi..., Target Deployment: [Pipelines Master] Pro..., Is Delegated: Yes, Pre-Deployment: No, Created On: 9/7/2023 5:44 PM). The URL at the bottom is 'https://org5494cfb.crm10.dynamics.com/main.aspx?appid=d74c4495-1849-ee11-be6d-6045bd...'.

SHARING DURING DEPLOYMENT

- Securely deploy with service principals
- Makers request sharing
- Approve or reject sharing with deployment

DEPLOYMENT NOTES

- Copilot generates deployment notes for pipeline deployments
- Gives admins insights into every deployed solution with zero effort
- Streamlines approvals

Deployment notes

The Cineplex Demo Solution is a comprehensive system designed to manage various aspects of Cineplex operations, from movie listings to event automation. Each component serves a specific function, contributing to the overall efficiency and effectiveness of the solution.

Key Components:

1. Cineplex events (Copilot): Assists in managing and automating Cineplex events.
2. Cineplex Event App (Classic Canvas App): A user interface for managing Cineplex events.
3. Cineplex events phone (Classic Canvas App): A mobile-friendly version of the Cineplex Event App for on-the-go management.
4. Available movies (Entity): Contains records of movies currently available at Cineplex.
5. Food Package (Entity): Manages information related to food packages offered at Cineplex.
6. Movie Event (Entity): Stores details about movie events organized at Cineplex.
7. Room (Entity): Keeps track of the rooms available for events and screenings.
8. Staff (Entity): Manages staff information for efficient operations.
9. Copilot event automation (Modern Flow): Automates event-related processes to enhance productivity.

BUILD YOUR FIRST PIPELINE

DEMO

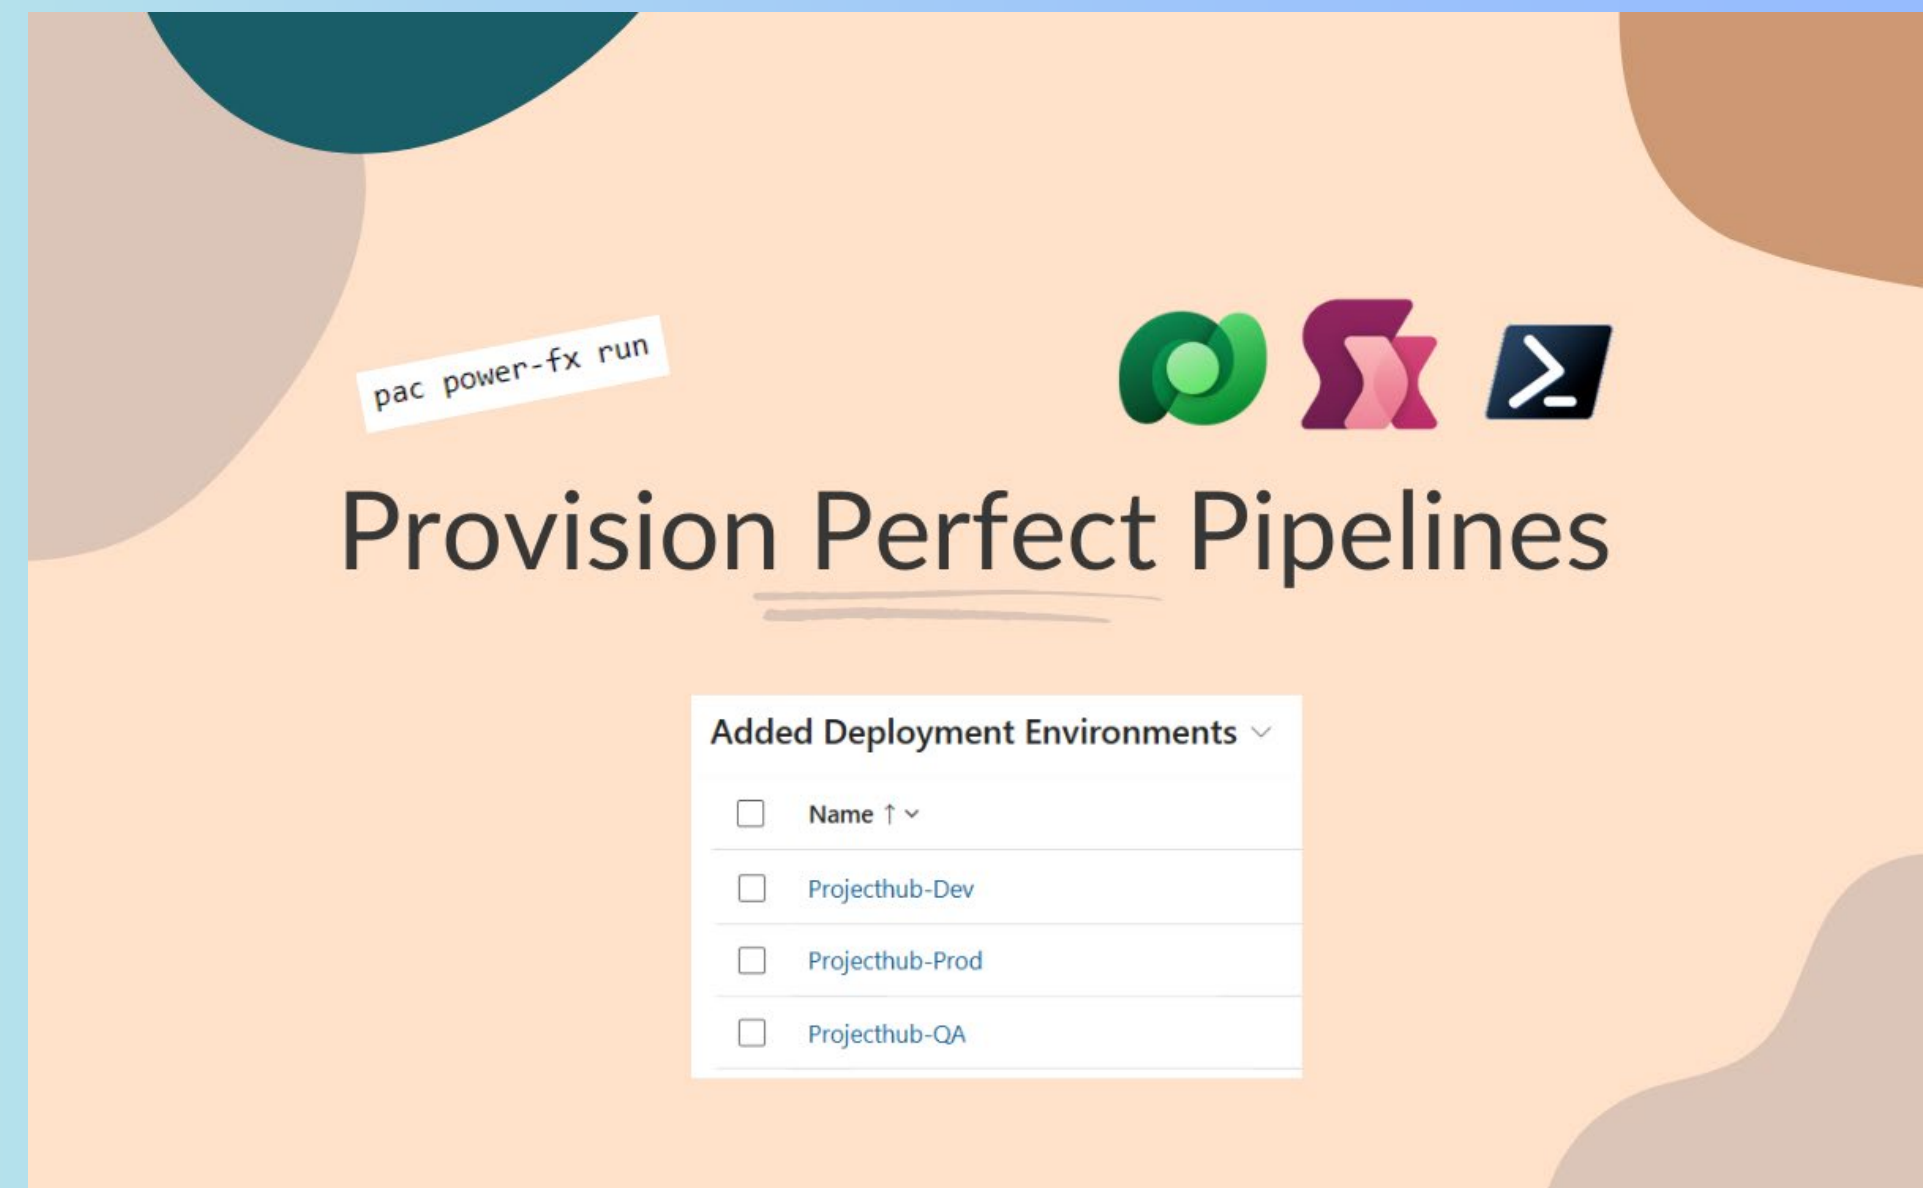

#BalticSummit2025

PROVISION PERFECT PIPELINE

- Elianne Burgers blogged about how to provision pipelines for projects more easily!

BalticSummit2025

EXTEND PIPELINES IN POWER PLATFORM

- Pre-export validation using custom business logic
- Delegated deployments that use service principals
- Pre-deployment custom steps with Power Automate cloud flows

The screenshot displays the 'Power Platform admin center' interface. The left sidebar contains navigation links: Home, Action center, Manage, Monitoring, Security, Licensing + usage, Copilot, Deployment, Support, and Admin centers. The main content area is titled 'Deployment' and includes an 'Overview' tab and a 'Pipelines' link. The 'Overview' section shows a 'Custom host: Contoso Prod Host' and a 'Take action' table with recommendations. Below this, the 'Pipelines activity' section shows 'Pending approvals' (389) and 'Failed deployments' (275). A 'Refresh' button is present. At the bottom, a table lists deployment requests.

Severity	Recommendation	Affecting	Updated	Category
High	Manage pending deployment approvals	8 pipelines	1/22/24	TBD
High	Add environments to a group with a default pipeline	2 environments	1/22/24	TBD
Medium	Upgrade environments to build apps more healthily	5 environments	1/22/24	TBD

Request title	Pipeline	Stage	Created	Owner
Deployment to Production	Aadi's pipeline	UAT	4:15 PM, 8/7/24	Aadi Kapoor
